Safety Guide

Important

The following information about safety should be used only as a guide. All products listed in this catalog shall be used in accordance with safety regulations set by OSHA and by the directive described by European standards EN12413 and EN13743 covering: Speed, Safety Guards, Flanges, Mounting Procedures, General Operating Rules, Handling, Storage, and Inspection of General Machine.

DO's

- Always handle and store wheels in a careful manner.
- Visually inspect all wheels before mounting for possible damage.
- Make sure operating speed of machine does not exceed speed marked on wheel & its blotter.
- Check mounting flanges for equal size, relieved as required and correct diameter.
- Be sure work rest is properly adjusted on bench, pedestal and floor stand grinders.
- Always use safety guard that covers a minimum of one half (1/2) the abrasive wheel.
- always wear safety glasses or some type of approved eye protection while grinding or cutting.

DONT's

- Use a wheel that has been dropped or broken.
- Force a wheel onto the machine or alter the size of the mounting hole.
- Ever exceed maximum operating speed established for the wheel.
- Grind on the side of conventional, straight or Type 41 wheels.
- Use a wheel on any machine that is not properly designed for the specific application of the wheel.
- Start the machine until the safety guard is properly and securely in place.

STORAGE CONDITIONS

- During storage, grinding wheels must not be subjected to exposure to humidity, water or other liquids.
- Any low temperature enough to cause the formation of condensation on the wheels when moving from storage to an area of high temperature
- Keep cartons away from damp or cold walls and floors where they may absorb moisture
